

INTRODUCTION

Congratulations, the SRM9000 series equipment is an advanced mobile transceiver and microphone using the latest DSP technology. It is designed for easy installation in today's vehicle where space is at a premium. SRM9000 can operate in a wide range of conventional and trunked radio systems. Your radio consists of a SRM9000 transceiver for local or remote installation, and a SRM9030 Alphanumeric Control Head which is arranged for mounting within view and reach of the driver. A microphone and speaker provide the audio interface. The Transceiver is software programmable with many customisable parameters to suit your individual requirements. Ask your dealer for details of upgrades available and a list of the ancillaries available.

WARNINGS

1. Do NOT operate your radio, without a handsfree kit, whilst driving a vehicle.
2. Do NOT operate your radio in an explosive atmosphere. Obey the 'Turn Off Two-way Radios' signs where these are posted, e.g. on a petrol station forecourt.
3. Do NOT touch the antenna while the radio is transmitting.
4. Do NOT operate the radio if the antenna has become disconnected or damaged.

TMC Radio are committed to continuous improvement, for this reason, specifications of this product may vary without prior notice.
